Job Behaviors

Ralph D. Brogada

The Culture Ethos Report

The following brief narrative covers (1) an Introduction, (2) a Traits Summary describing inherent behaviors observed when not modifying conduct to suit surroundings, and (3) a Job Behavior Summary describing how the respondent perceives they need to behave to meet the demands of the role.

Introduction

The first section, "Survey Traits", is a summary of work-related characteristics that assess who the respondent is outside of work — inherent behaviors typically established by ages 8–12. The second section, "Job Behaviors", reflects how the respondent perceives they need to behave to meet the demands of their existing job. There is no pass or fail; the purpose is to help managers understand themselves and the role from the respondent's perspective.

Traits Summary

Best-fit archetype: The Technical Expert (Research quadrant, fit 95/100). Goes deep on the work. Owns the technical truth in their domain and is happiest with structured, rule-bound problems they can solve carefully.

Strengths

- Deep technical mastery
- High accuracy and rigor
- Holds the standard for the team

Watch-Outs

- May resist work outside their specialty
- Can be impatient with non-experts

Ideal Roles

- Senior engineer or scientist
- Specialist consultant
- Subject-matter expert

Job Behavior Summary

The following dimensions show meaningful divergence between the respondent's natural baseline and how they behave at work. Larger gaps indicate sustained behavioral effort.

Ingenuity — 23 pt gap

At work you push your ingenuity higher than your natural set point — this is effort that compounds over time.

Per-Trait Detail

Code	Trait	Natural	Work	Pop. %ile (n/w)	Gap
A	Autonomy	23	23	23 / 23	0
B	Sociability	6	6	6 / 6	0
C	Patience	1	17	1 / 17	15
D	Conformity	15	15	15 / 15	0
L	Logic	49	35	49 / 35	13
I	Ingenuity	10	33	10 / 33	23
